Horizon 2020 TIPS

Stéphane Hogan of the European Union's Delegation to the African Union offers three tips aimed at researchers, institutional leaders, and governments.

Researchers

“Researchers should present to their partners clearly and concisely what they can bring to these projects. They should try to seek support from their institution – for example, if it's a first participation make sure their institution is formally registered with the European Commission, an administrative process that is essential to becoming eligible to receive funding.”

Institutions

“Institutions can identify topics that would align with their research capacities and the individual researchers in their institutions, and support researchers in the process of participating.”

Governments

“In the run up to a renewed set of Horizon 2020 opportunities in 2016 and 2017, governments should make sure they have effective NCP networks in place.”
